

REGULATION TO IDENTIFY THE RELEVANT MARKETS IN THE ELECTRONIC COMMUNICATIONS SECTOR

Part II – IDENTIFICATION OF SIGNIFICANT WHOLESALE MARKETS IN THE ELECTRONIC COMMUNICATIONS SECTOR

Art.1. – (1) On grounds of the provisions of Part I of the present Regulation, the following significant product markets are identified:

1. The market of access to public networks of fixed telephony, including access to public networks of fixed telephony in order to initiate, terminate and route (**tranzit comutat**) voice and additional data services;

2. The market of access to each mobile telephony network in view of terminating voice service calls, which includes access to each mobile telephony network in view of terminating any voice service calls originating in other mobile or fixed telephony networks.

(2) The geographic market corresponding to any of the product markets identified as of par. (1) is the national market, delimited by the territory within the Romanian borders.

Art.2. – ANRC will revise the markets identified as of art.2, in the sense of adding new markets, whose characteristics may justify imposing specific obligations to the providers of electronic communications networks and services with significant power on these markets or in the sense of modifying the identified markets.

Art.3. – For the understanding of the present Regulation, the next terms are defined as follows:

a) **retail market** – the market of networks or services for final users;

b) **wholesale market** – the market of access to networks or services to be used for re-sale to other providers of electronic communication services;

c) **voice services – isochrone services**, where the transmission and the reception of signals are synchronized, with the acceptance of delays within defined limits;

d) **data services – asynchrone services**, where the transmission and the reception of signals do not need to be synchronized between the sender and the recipient, with the acceptance of delays at the reception of data packages;

e) **additional data services** – dial-up services, ISDN bra, fax and telefax.
