

ANCOM Action Plan for 2022

<i>No.</i>	<i>Action</i>	<i>Action grounding</i>	<i>Timeframe</i>	<i>Strategic objective</i>	<i>Action line</i>
1	Approve the technical and economic conditions for access to the physical infrastructure (underground ducts) for public electronic communications networks in the municipality of Zalau	Enforcement of the provisions of Art. 25 of Law no. 159/2016	Q1 2022	Network competitiveness; Maximize the availability of services	Symmetric regulation; Increasingly shared networks; Stimulate service demand
2	Draft amendment of Decision no. 1023/2008 for transposing the relevant provisions on emergency communications to 112 into the secondary legislation, in accordance with the European Electronic Communications Code	Transposing into secondary legislation the relevant provisions on emergency communications after the approval of the normative act transposing into national law the Directive of the European Parliament and of the Council establishing the European Electronic Communications Code	Q2 2022	Capitalize the benefits of technology progress in favour of the end-users; Actual enforcement of the European Electronic Communications Code	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
3	Set up an ANCOM website section on the relevant standards for designing, installing, operating and maintaining public electronic communications networks and their associated facilities	Carrying out ANCOM's attributions according to the provisions of Art. 29 of Law 159/2016	Q4 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress to the benefit of end-users	Monitor and regulate the electronic communications and postal services markets
4	Draft amendment of Decision 1108/2017 for setting the format and the manner of sending information on the roll-out and geographic location of public electronic communications networks and their associated facilities	The need to update the decision currently in force in order to reflect the market evolution and the legislative amendments	Q2 2022	Promote network competitiveness; Maximize service availability; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Mapping the networks, infrastructure and service availability, as well as other activities to foster closing the rural-urban gap and connectivity for all; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
5	Authorize the mobile operators' levying sustainability surcharges	According to the provisions of Art. 6c para. (1) of Regulation (EU) No 531/2012, "In specific and exceptional circumstances, with a view to ensuring the sustainability of its domestic charging model, where a roaming provider is not able to recover its overall actual and projected costs of providing regulated roaming services [...] from its overall actual and projected revenues from the provision of such services, that roaming provider may apply for authorisation to apply a surcharge. That surcharge shall be applied only to the extent necessary to recover the costs of providing regulated retail roaming services having regard to the applicable maximum wholesale charges."	Q3 2022	Maximize service availability	Symmetric regulation; Increasingly shared networks; Stimulate service demand
6	Amend/draw up a decision on informing the users	A key component of protecting the electronic communications services users is ensuring that the providers of publicly available electronic communications services adequately inform the end-users, since access to transparent, updated and comparable information is essential for the consumers in competitive markets, enabling them both to make documented choices with regard to electronic communications services and to enjoy other user-specific rights.	Q2 2022	Network competitiveness; maximize service availability	Symmetric regulation; Increasingly shared networks; Stimulate service demand
7	Draw up a decision on the implementation of universal service in the electronic communications sector	Access to electronic communications services is deemed to be a fundamental right of the citizens, essential to their social life in the community. It is recognized that, nowadays, electronic communications services cover much more than the personal or business aspects of communication. Electronic communications services provide a lot of information, goods and services to the public. People who lack access to electronic communications services risk being left behind in society.	Q1 2023	Network competitiveness; Maximize service availability	Symmetric regulation; Increasingly shared networks; Stimulate service demand
8	Amend Decision no. 160/2015 on setting measures for disabled end-users	Implement regulatory measures that are more efficient and oriented towards the disabled end-users' needs, required for reaching functional equivalence as regards the provision of publicly available electronic communications services.	Q2 2022	Network competitiveness; Maximize service availability	Symmetric regulation; Increasingly shared networks; Stimulate service demand
9	Review the market for wholesale high-quality access provided at a fixed location	The actions are aimed at reviewing the market definition and the competition status in the respective market, with a view to re-assessing the need to impose regulatory measures	Q2 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
10	Review the general authorisation regime on the provision of electronic communications networks and services	This action is necessary mainly for harmonising the secondary legislation, to be adopted by the Authority, with the primary legislation in the field, which is being reviewed and will transpose in detail the single European regulatory framework for the sector. It is also required by the technology advancements and the emerging models in the electronic communications market, which have brought about innovation and new challenges as regards service substitutability and ECN convergence.	Q2 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services; Actual implementation of the new European Electronic Communications Code.	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
11	Amend ANCOM President's Decision no. 512/2013 on setting the minimum security steps to be taken by the providers of public electronic communications networks or of publicly available electronic communications services and reporting incidents with a significant impact on the provision of electronic communications networks and services	Review and update the secondary legislation in the field of electronic communications networks and services taking into account the amendments in the primary legislation, the technology advancements and the national and European context.	Q2 2022	Actual implementation of the new European Electronic Communications Code.	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
12	Report on monitoring compliance with the obligations concerning open internet access	ANCOM ensures, within its scope of competence, that the internet access service providers observe the provisions of Regulation (EU) 2015/2120	Q2 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market; Maintain and exercise the capacity to influence the European and international policies within the scope of competence of ANCOM

<i>No.</i>	<i>Action</i>	<i>Action grounding</i>	<i>Timeframe</i>	<i>Strategic objective</i>	<i>Action line</i>
13	Report on the quality of the internet access service in 2021	Analyse the quality of electronic communications networks and services	Q2 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market; Effective consultation of all the interested target audiences on all the Authority's major projects
14	Report on the incidents that affected the security of electronic communications networks and services in 2021	The analysis is aimed at assessing the providers' response to significant security incidents in 2020, in accordance with the requirements set out by ANCOM's Decision 512/2013	Q2 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market; Effective consultation of all the interested target audiences on all the Authority's major projects
15	Amendment and completion of the general authorisation regime on the provision of postal services	The general authorisation regime for the provision of postal services sets the procedure and the conditions of entry in the postal services market, as well as the providers' rights and obligations in their capacity as postal service providers. Therefore, this action is required for ensuring a regulatory framework adjusted to the legislative developments in the postal services field, as well as to the new and emerging technologies and practices in the market.	Q1 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services.	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
16	Report on the analysis of observing the quality objectives, for 2021, set on the universal service provider in the postal services field	Maximize the availability of postal services and promote the interests of the users of postal services within the scope of universal service. Watch the fulfilment of the USP's legal obligations.	Q3 2022	Maximize the availability of digital and postal services	Monitor and regulate the communications and the postal services markets; Verify compliance with the legal obligations imposed by regulations or by administrative acts in the communications or postal services fields; Transparent and continuous communication with the interested parties regarding ANCOM's activity

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
17	Report on the quality of parcel services and the impact of electronic commerce on the postal services market during 2021	Increase the level of interaction between the participants on the postal services market in Romania and monitor the quality of parcel services and the impact of e-commerce on the postal services market.	Q4 2022	Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
18	Survey on the implementation of self-service services in the delivery of postal items	Analysis of the legal framework and of the developments regarding postal items in the field of services with delivery at a point chosen by the addressee	Q4 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
19	Review ANCOM President's Decision no. 333/2013 on collecting statistical data in the electronic communications field and the enforcement of this decision	The reviewed Decision 333/2013 grounds ANCOM's collecting statistical data regarding the electronic communications market, the Authority being the official statistics issuer in the electronic communications and postal services fields. Having regard to the competition, technology and legislation developments (especially the transposition into the national legislation of the provisions of Directive (EU) 2018/1972 establishing the European Electronic Communications Code, the decision needs to be amended and the SSCPDS application needs to be subsequently updated in respect of the statistical data collection inquiries, while the ECNS providers need to be informed accordingly.	Q2 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services	Transparent and continuous communication with the interested entities, regarding ANCOM's activity; Effective consultation of all the interested target audiences on all the Authority's major projects
20	Statistical data reports on the electronic communications market	Monitor competition in the electronic communications market, inform the users; GEO 22/2009, D333/2013; The 2 regular statistical data reports (for H2 2021 and, respectively, for H1 2022) are used for presenting the market landscape, the level of competition, thus contributing to informing the end-users and to laying down development policies both in the electronic communications field and in the ancillary fields. The reports rely on the statistical data reported by the ECNS providers based on Decision 333/2013 (for H2 2021), and on the reviewed version of this Decision (for H1 2022), while using the regular market surveys conducted by ANCOM, as well.	Q4 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
21	Map of coverage with fixed services - telephony, internet, TV	Two updates (for H2 2021 and H1 2022), relying on the information reported by the ECNS providers based on Decision 987/2012 - Annex 1.	Q4 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects

<i>No.</i>	<i>Action</i>	<i>Action grounding</i>	<i>Timeframe</i>	<i>Strategic objective</i>	<i>Action line</i>
22	Reports on international roaming services	Reports for Q2 and Q3 2021, respectively for Q4 2021 and Q1 2022, drawn up based on the enforcement of the provisions of Regulation (EU) No 531/2012	Q4 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services.	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
23	Annual statistical data report on the postal services market in 2021	Monitor the competition status in the postal services field, inform the end-users; GEO 22/2009, D388/2020; given ANCOM's capacity as an issuer of official statistics in the postal services field, the reports are part of the Annual National Statistics Programme, adopted by GD every year Regular statistical data reports are used for presenting the market evolution, the level of competition, thus contributing to the end-user information and to the elaboration of development policies, both in the field of postal services and in ancillary domains.	Q3 2022	Promote the competitiveness of communications and postal services networks; Maximize the availability of digital and postal services.	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market;
24	Monitor the implementation of Regulation (EU) 2018/644 on cross-border parcel delivery services (Articles 4 and 5)	Statistical data and information submitted by the postal service providers are collected, verified and relayed to the European Commission, according to the provisions of Regulation (EU) 2018/644 and Regulation (EU) 2018/1263	Q4 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services	Monitor and regulate the electronic communications and postal services markets; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market;
25	The Regulatory Strategy in The Postal Services Field for 2021-2024	Strategic planning of the regulatory activities in the postal services field for the period 2021-2024	Q3 2022	Strategic planning	Strategic planning
26	Adopt a decision on organising a selection procedure (set conditions for awarding the usage rights and the rules for organising the selection procedure) for awarding usage rights for the available frequencies in the 700 MHz, 1500 MHz, and 3400-3800 MHz bands, for the provision of broadband public electronic communications networks and publicly available electronic communications services and other necessary normative acts	Action aimed at achieving the objectives on the coordinated introduction of 5G in the Union; therefore, adequate spectrum resources need to be made available to the electronic communications services providers, by implementing the relevant Decisions of the European Parliament and of the Council on harmonising the frequency bands 700 MHz, 1500 MHz, and 3400-3800 MHz for terrestrial systems capable of providing wireless broadband electronic communications services in the Union	Q2 2022	Promote the competitiveness of electronic communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Administrate the limited resources of the state in the field of electronic communications; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
27	Review the ANCOM President's Decision no 551/2012	The selection procedure for awarding frequency usage rights in new frequency bands (e.g. 700 MHz, 1500 MHz, 3400-3800 MHz for a long term), based on the European Electronic Communications Code transposed in Romania, which is planned to be organised by ANCOM in 2022, will require Decision 551/2012 to be reviewed (e.g. with a view to introducing spectrum fees for the new frequency bands to be awarded, reviewing the spectrum fees in the existing bands, etc.) for maximizing ANCOM's statutory objectives and fulfilling Romania's commitments provided in the Connectivity Roadmap.	Q2 2022	Promote the competitiveness of electronic communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Administrate the limited resources of the state in the field of electronic communications; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
28	Carry out the selection procedure for awarding frequency usage rights in the bands envisaged for the provision of public broadband electronic communications networks and services	Making available - to the providers of public electronic communications networks and of publicly available electronic communications services - the spectrum resources required for the implementation of broadband electronic communications services (including 5G) at national level; Implementing the relevant Decisions of the European Parliament and of the Council on harmonising the frequency bands envisaged for terrestrial systems capable of providing wireless broadband electronic communications services in the Union	Q3 2022	Promote the competitiveness of electronic communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Monitor and regulate the electronic communications and postal services markets; Administrate the limited resources of the state in the field of electronic communications; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
29	Questionnaire for the electronic communications market regarding the opportunity of awarding certain frequency usage rights for the provision of MFCN public networks, in bands above 24 GHz ("millimetre bands"), with the subsequent updating of ANCOM's Position paper on the 26 GHz band	This action is aimed at determining the degree of interest manifested in the national electronic communications market in respect of purchasing usage rights for the provision of MFCN public networks in the 24.25-27.5 GHz band, as well as in other frequency bands above it, taking due account of the evolution of the relevant technical regulations on the CEPT and EU level; Moreover, the action is aimed at implementing Art. 54 of Directive (EU) 2018/1972 of the European Parliament and of the Council establishing the European Electronic Communications Code; Following the processing of the questionnaire results, ANCOM will analyse whether there is clear evidence of market demand for the 26 GHz band, respectively for the rest of the bands within the scope of the questionnaire, based on which it will decide on the opportunity of organising a selection procedure for awarding radio frequency usage rights for the provision of MFCN public networks in frequency bands above 24 GHz (millimetre bands) in 2022 or later on; Consequently update the Position Paper adopted by ANCOM for the 26 GHz band, taking into account the results of the questionnaire and ANCOM's opportunity analysis mentioned above.	Q1 2022	Promote the competitiveness of electronic communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Administrate the limited resources of the state in the communications field
30	Take part in drawing up the request for the assignment of frequency bands for a new geostationary orbital position, additionally allocated to Romania; send the request to the Radiocommunication Bureau of the International Telecommunication Union (BR ITU) and initiate the international coordination procedure for space radiocommunication	ANCOM will start this action upon the request of the entities interested in the assignment of frequency bands for the new geostationary orbital position allocated to Romania, in order to prepare these resources for actual use in communications projects of the requesting entities. This action is taken with a view to carrying out the attributions to be entrusted to ANCOM following the review of the primary legislation in the field (Government Emergency Ordinance no. 111/2011 on electronic communications, by Law no. 140/2012, with the subsequent amendments and completions), transposing Directive (EU) 2018/1972 of the European Parliament and of the Council establishing the EECC - i.e. stipulate specific attributions on the coordination of radio frequencies corresponding to Romania's orbital positions	Q4 2022	Promote the competitiveness of electronic communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Administrate the limited resources of the state in the communications field; Maintain and exercise the capacity to influence the European and international policies within the scope of competence of ANCOM

No.	Action	Action grounding	Timeframe	Strategic objective	Action line
31	Review secondary legislation on the management and administration of numbering resources in accordance with the primary legislation that transposes the Directive establishing the European Electronic Communications Code into the national law.	Harmonize the secondary legislation in the field of regulating spectrum usage which lies within the scope of competence of ANCOM with the primary legislation in the field (Government Emergency Ordinance no. 111/2011 on electronic communications, approved with amendments and completions by Law no.140/2012, with the subsequent amendments and completions), currently under review, following the obligation to transpose in Romania Directive (EU) 2018/1972 of the European Parliament and of the Council on establishing the European Electronic Communications Code. Review the provisions of ANCOM's relevant decisions in force (where necessary) and issue new decisions in accordance with the new legal provisions to be adopted, so that the entities envisaged by them should reap the advantages and opportunities offered by the single European legal framework adapted to the technological developments in the field.	Q2 2022	Full transposition of the new European Electronic Communications Code	Administrate the limited resources of the state in the communications field; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
32	Update radio interfaces RO-IR in ANCOM President's Decision no. 311/2016 on the licence-exempt radio frequencies or frequency bands	Radio interface regulations applicable to the EU Member States define technical requirements for the radio equipment to be placed on the EU market. Update the harmonised technical conditions of radio spectrum use by short-range devices (SRD) and ultra-wide band (UWB) equipment	Q4 2022	Capitalization of technology progress benefits in favour of the end-users	Administration of the limited resources of the state in the communications field; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
33	Extend the validity of frequency usage rights in the 2100 MHz band, which are due to expire in January 2022.	The action is aimed at: ensuring the spectrum resources required for the provision of public broadband electronic communications networks and services that are technology-neutral, at a national level, in accordance with the relevant Commission Decision on the harmonisation of the frequency bands 1920-1980 MHz and 2110-2170 MHz for terrestrial systems capable of providing electronic communications services in the Union; ensuring the uninterrupted operation of electronic communications services provided by means of using the frequencies in the 2100 MHz band.	Q1 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services; Capitalize the benefits of technology progress in favour of the end-users	Administrate the limited resources of the state in the electronic communications field
34	Review secondary legislation on the management and administration of numbering resources in accordance with the primary legislation that transposes the Directive establishing the European Electronic Communications Code (EECC) into the national law.	Ensure optimum conditions for implementing the new provisions of the primary legislation; Adopt and publish regulatory decisions	Q2 2022	Promote the competitiveness of communications and postal networks; Maximize the availability of digital and postal services; Actual enforcement of the new European Electronic Communications Code	Monitor and regulate the electronic communications and postal services markets; Administrate the limited resources of the state in the communications field; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Effective consultation of all the interested target audiences on all the Authority's major projects
35	Prepare the Plenipotentiary Conference of the International Telecommunications Union (ITU) in the period 26 September - 14 October 2022.	Strengthen ANCOM's position on the national and international level by conducting international relations activities - act in pursuit of the national sector policy and strategy objectives within the international bodies and organisations	Q4 2022	Strengthen the Authority's role in the development of the communications and postal services markets, in the current context of major changes; Increase awareness of ANCOM's role and attributions and the level of trust and involvement of the entity groups interested in its activity	Representation within international bodies and organisations; Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Maintain and exert the capacity to influence European and international policies in the fields within ANCOM's scope of competence; Effective consultation of all the interested target audiences on all the Authority's major projects
36	Campaign/Actions aimed at informing on 5G benefits and effect conducted among local authorities, citizens and businesses and at reducing the information asymmetry regarding the implementation of 5G in Romania	The National Strategy on the implementation of 5G in Romania, adopted by the Government of Romania by Decision no. 429 of 20 June 2019, provides also the obligation to inform the public opinion on the benefits of new technologies	Q4 2022	Increase the information level on ANCOM's role and attributions and enhance the level of trust and active involvement of the interested audience groups; Capitalize the benefits of technology progress in favour of the end-users	Transparent and continuous communication with the interested entities, regarding ANCOM's activities; Inform and educate the electronic communications and the postal services users in order to enable them to protect their interests and obtain maximum benefits in a competitive market; Effective consultation of all the interested target audiences on all the Authority's major projects

<i>No.</i>	<i>Action</i>	<i>Action grounding</i>	<i>Timeframe</i>	<i>Strategic objective</i>	<i>Action line</i>
37	Launch the beta version of the eANCOM portal for the communications operators, as a collaborative instrument for access to technical and economic information managed in the integrated spectrum management electronic system	Increase transparency, improve access to information, and increase the degree of collaboration by exchanging, streaming and enabling access to essential technical information required by operators	Q4 2022	Digitize ANCOM's activity, thus participating in the digitization of Romania, as a common effort of the central public administration and of the whole Romanian society	Enrich and optimize ANCOM's presence online, both by increasing the number and quality of the services offered digitally to our beneficiaries, and by means of websites dedicated to presenting the Authority's activity and of the networking platforms/social networks; Increase efficiency by digitizing activity, automating processes and enhancing the capacity and security of IT systems.
