

# INTERNATIONAL SPACE RADIO MONITORING MEETING

1 - 3  
SEPTEMBER 2026

BUCHAREST  
ROMANIA

Name & Organisation

***Fuad Aslanov***

*Vice-chair of Azercosmos, Space Agency of the Republic of Azerbaijan*

Presentation title

*Azercosmos in the Global Space Ecosystem*

Abstract

As satellite networks become more interconnected and spectrum environments complex, effective space radio monitoring is essential for ensuring service continuity, regulatory compliance and operational resilience. This presentation will examine how stronger cooperation between satellite operators, space agencies and regulators can improve the identification, reporting and resolution of harmful interference.

Drawing on Azercosmos' perspective as both a space agency and satellite operator, the presentation will highlight the value of information exchange, coordinated procedures, expertise and international collaboration. It will also explore how resilient monitoring frameworks can support reliable broadcasting, connectivity, critical infrastructure and emergency communications.

The presentation will argue that space radio monitoring should be viewed not only as a technical or regulatory function, but also as a strategic element of risk management and service quality. By strengthening cooperation across the satellite ecosystem, stakeholders can respond effectively to interference and contribute to a safer, more sustainable and resilient space communications environment.

Short bio

Having joined Azercosmos in 2015 with an aim to develop the vision and strategy for the new directions within the company's scope, such as Marketing and Business Development, Mr. Fuad Aslanov made a substantial impact on the growth and streamlining of business processes. During his tenure as the Director of Marketing, Business Development and Sales department in 2017-2022, he significantly contributed to the activities of Azercosmos by developing the business models for new satcom solutions and products, advanced the revenue growth, and transformed the Azercosmos teleport into a widely recognized international centre by establishing solid partnerships and cooperative ties within the global space telecommunication industry. Since his appointment as a Vice-chairman of Azercosmos, Space Agency of the Republic of Azerbaijan in 2022, Mr. Aslanov acts as the Chief Commercial Officer and leads Azercosmos in developing new business lines and strengthening international cooperation. He is in charge of identifying and establishing new, long-term business opportunities for the purpose of supporting the company's core capabilities through enhancing commercial activity. He is also leading the cooperation with various governmental institutions to stimulate the development of the existent business climate and state regulations in the space sector. Mr. Aslanov is directly involved in the events related to the International Astronautical Federation to foster efficient collaboration between Azercosmos and global space community. In his previous role in 2010-2014, he was the member of the Telia Sonera Eurasia Analytical Competence Team and Telia Sonera International Mobile Pool.

Fuad Aslanov holds an MA degree in Economics from Central European University, Hungary, a mini-MBA in Telecom Business and Communication Technology from KTH Royal Institute of Technology, Sweden, and a BA degree in Economic Cybernetics from Baku State University.
