

7th INTERNATIONAL SPACE RADIO MONITORING MEETING

1 - 3
SEPTEMBER 2026

BUCHAREST
ROMANIA

Name & Organisation

Qi CHEN, State Radio Monitoring Center, China

Presentation title

Trends in GSO Satellite Interference and Complex Geolocation Case Studies

Abstract

This presentation begins with an overview of recent trends in Geostationary Satellite Orbit (GSO) interference, characterized by a growing number of incidents, increasingly diversified interference types, and an expanding impact across multiple satellites. Following that, it presents two cases of complex interference geolocation: periodic short-pulsed interference and terrestrial re-transmission interference

Short bio

Engineer from Shenzhen Monitoring station of the State Radio Monitoring Center, China, focusing on satellite interference geolocation and satellite radio monitoring.
